Bonus HW: Git & Github

請將這學期寫過的程式碼(包含上機考與作業)上傳至 github，參考步驟如下:

1. 在 github 上創建一個空的 repository 並 clone 至本地端(自己的電腦上)

 2. 將程式碼檔案都放入這個已經 clone 至本地端的 repository

3. 按照 git add、git commit、git push 的步驟將這個 repository 推送至 github 上 4. 進行螢幕截圖，為了確保是由你本人完成的，截圖時需同時截到 github 的 repository 畫面與自己登入 moodle 時顯示名字的畫面

5. 將該截圖貼到 word 檔內，並在檔案中附上自己的 github repository 連結 (請將該 repository 設成公開，這樣助教才能點開超連結並看到 repository 的內容)

6. 將該 word 檔轉成 PDF 檔，檔名為:學號_bonus_HW.pdf，例如:P76124752_bonus_HW.pdf

7. 上傳至 moodle 繳交區

Please upload the code you wrote this semester (including exams and assignments) to GitHub. Follow the steps below:

1. Create an empty repository on GitHub and clone it to your local machine (your computer).
2. Place all your code files into this repository that you have cloned to your local machine.
3. Follow the steps: git add, git commit, and git push to push this repository to GitHub.
4. Take a screenshot to ensure that it is done by you personally. The screenshot should include both the GitHub repository page and the page showing your name when logged into Moodle.
5. Paste the screenshot into a Word document, and include the link to your GitHub repository in the document (please make sure the repository is public so that the TA can click the hyperlink and view the contents of the repository).
6. Convert the Word document to a PDF file. The file name should be: studentID_bonus_HW.pdf, for example: P76124752_bonus_HW.pdf.
7. Upload the PDF file to the Moodle submission area.
